UNICHROME CS

Mixture of Chrome and synthetic tannins

TYPICAL PROPERTIES

Appearance	: Light green powder
Active Substance	: $94 \pm 1\%$
pH (10% sol.)	: 4.5 ± 0.5
Ionic Character	: Cationic

DESCRIPTION

UNICHROME CS can be used as a retanning agent alone or together with basic chrome salts. **UNICHROME CS** gives a very uniform colour distribution on the grain and cross-section, together with softness and fullness. It is also recommended for the production of pale or light coloured leathers. **UNICHROME CS** increases the light fastness and mechanical stress of the leathers.

APPLICATION

UNICHROME CS can be added into the pickle float as 2 - 6% and after running 2 hours then, normal tanning can start. For the retanning of shoe-upper 2 - 4% is given on shaved weight. In double-face production, 4 - 8 g/l is recommended for convenient results.

PACKAGING, STORAGE AND SHELF LIFE

Available in 25 kg bags. Store in accordance with local regulations. Keep the package closed when not in use. Store in a dry place and protect from direct sunlight. Shelf life is 24 months from the date of manufacture when stored in its original package. For more information see Safety Data Sheet.
