UNIOIL CS

Mixture of cationic synthetic oils

TYPICAL PROPERTIES

Appearance	: White paste
Active Substance	: 50 ± 2%
pH (10% sol.)	: 4.0 ± 0.5
Ionic Character	: Cationic

DESCRIPTION

UNIOIL CS is a cationic charged synthetic oils mixture. **UNIOIL CS** is applied at the end of fatliquoring process, in order to give a pleasant touch-handle effect to the grain of the leathers. Besides, **UNIOIL CS** penetrates easily into the leather and hence causes extra internal lubrication of fibres. **UNIOIL CS** is also preferred for wet-blue leathers, because it keeps the moisture content stable for long periods, which leads to easier and shorter wetting-back process for efficient post-tanning operations.

APPLICATION

UNIOIL CS can be advocated as, 0.5 - 2.0% for garment, upholstery, shoe-upper or similar leathers where a special grain effect is required.

PACKAGING, STORAGE AND SHELF LIFE

Available in 120 kg drums or in IBC. Store in accordance with local regulations. Keep the lid closed when not in use. Store in a dry place and protect from direct sunlight. Shelf life is 12 months from the date of manufacture when stored in its original package. For more information see Safety Data Sheet.
