UNITAN NN

Naphthalene sulphonic acid condensate

TYPICAL PROPERTIES

Appearance	: Beige powder
Active Substance	: 98 ± 1%
pH (10% sol.)	: 7.5 ± 0.5
Ionic Character	: Anionic

DESCRIPTION

UNITAN NN is an excellent dispersing agent, which is used in the post-tanning operations and helps the penetration of acid dyes, vegetable tannins and fatliquors. **UNITAN NN** doesn't alter the shade and allows uniform colour distribution on grain and suede sides.

APPLICATION

UNITAN NN can be used 1 - 3% on shaved weight for 5 - 10 minutes before adding dyestuff to the dyeing bath. It is suggested to use as a dispersing agent in vegetable tanning around 10 - 20% on the total weight of tannin extract.

PACKAGING, STORAGE AND SHELF LIFE

Available in 25 kg bags. Store in accordance with local regulations. Keep the package closed when not in use. Store in a dry place and protect from direct sunlight. Shelf life is 24 months from the date of manufacture when stored in its original package. For more information see Safety Data Sheet.
